

PROJECT MANAGEMENT

DISCOVER

Project Management trainings help any manager optimize the planning, execution and monitoring of any kind of project. In a business world that grows more difficult every day, skilled project managers who can handle complex projects are hard to find. The workshops offer the possibility for hands-on learning, combined with practice of the critical tools and techniques that have been proven necessary for project management's success.

The proposed project management workshops are designed for experienced or new Project Managers who wish to master the entire PM process.

AUDIENCE

Project Management workshops are designed for anybody who works in project based industries and is expected to plan, execute, monitor and evaluate any kind of project:

- Project Managers
- Program Managers
- Experienced Team Leaders
- Developers
- Account Managers

BENEFITS

Participants will acquire the knowledge and tools they need to get projects started right and completed successfully:

- Understand the various project management approaches
- Master the most important aspects of all project management phases
- Get accustomed to agile and scrum methodologies
- Understand the importance of stakeholder analysis
- Acquire the knowledge to develop a WBS and determine the critical path of a project
- Become an expert in managing and inspiring the team that executes a project

As a result, in this program, participants will cover different modules:

Module 1: Project Management is the application of knowledge, tools, skills, and technique to project activities to meet specific objectives

Module 2: Identifying requirements/needs/establishing clear goals

Module 3: Balancing competing demands of cost, time and scope and link it to the project quality

Module 4: Meeting the expectations of all the stake-holders: users, company, customers, teams and vendors
